To whom it may concern:

Mr. Norm Delson was a tremendous help with my business's computer issues. From security to operating system help, Norm was the man. I have called Geek Squad before and spent hundreds for them to tell me they cant help.

We all (I'm sure) have spent countless infuriating hours chatting with someone across the world that never helped me with my issues. After finding Delson Computer and Norm, who lives just down the street, my prayers have been answered!

His service is the fastest I have ever seen, and remotely helped me with my PC and Lap Top issues. Delson Computer is fast, local, trust worthy, English speaking, informative, and reasonably priced.

Look no further. This man came to the rescue for my business and I highly recommend him.

Cheers,
Michael Curtis,
