

May 3, 2010

To whom it may concern:

Delson Computer has been an invaluable asset to my home based CAD business. Norman most recently assisted me with the purchase of a new computer, removed the Vista operating system, and installed XP at my request. He also installed numerous software programs that have made me more productive and my job easier. The computer has run fast and flawlessly since Norm last laid his hands on it, his fees are extremely reasonable, and he has been a pleasure to work with.

I would highly recommend Delson Computer to all my friends, relatives, and business associates.

Sincerely,

Tom Wise
